A Budget steps become tissue under positional demand
κ_B
$\kappa_B/2$
$\kappa_B/4$
$\kappa_B/8$
decoupling
positional (rank-based) benefit
saturating ecological benefit
half of each
Mean tissue investment $\bar{B}$ (SD)
Generation (thousands)
B Exact equilibrium check
$\mu^* = \beta_S\sqrt{R/V_P}\,/\,c$
individual-based simulation (6 replicates)
exact recursion
Mean capacity $\bar{A}_t$ (SD)
Generation
